AVIATION

Synthetic leather factory.

AERO-LEATHER is a synthetic leather manufactured
by **AUTOSTOP AVIATION**.

Our seat cover manufacturing facility is located adjacent to the AERO-LEATHER production facility, allowing increase efficiency by eliminating transportation costs to the manufacturing unit.

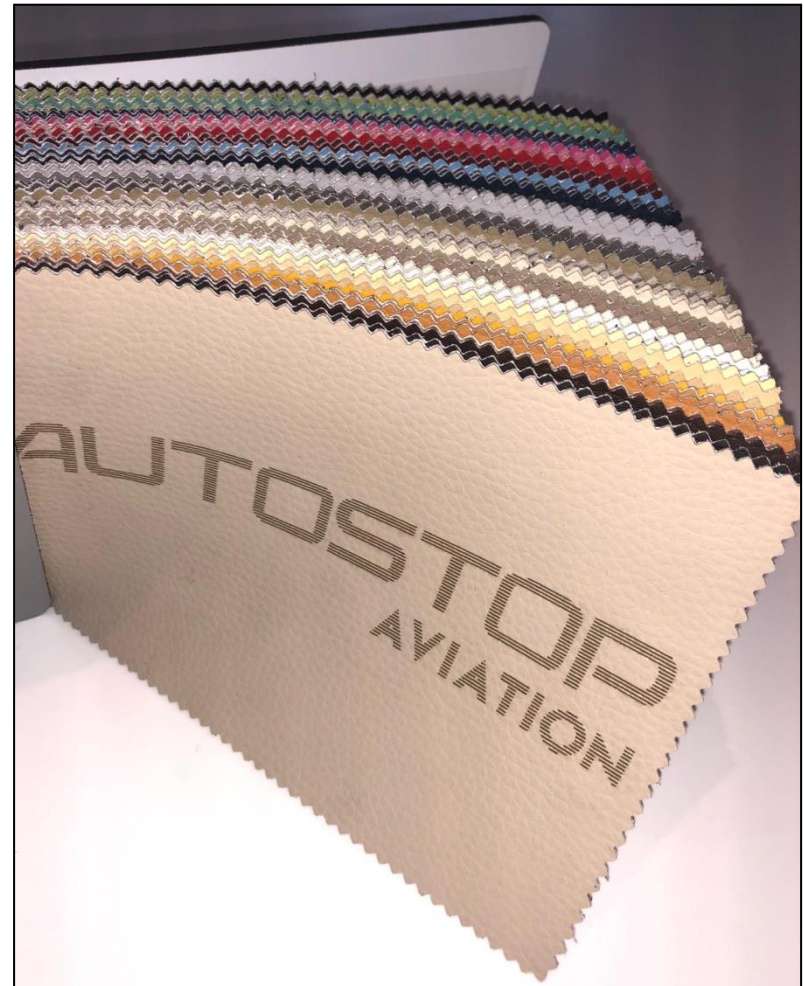

Compared to leather hides, our synthetic AERO-LEATHER is lighter by up to 25%. This contributes to airline operators fuel saving initiatives.

Our AERO-LEATHER is available in a range of grains, finishes and colours. The high durability of the leather fibre composite adds to passenger in flight experience.

AERO-LEATHER is an ingenious alternative to reconstructed leather, and genuine leather. This innovative material offers advantages in aircraft seat maintenance and also stands out with regard to passenger well-being.

Product of Serbia

AUTOSTOP AVIATION has developed a standard colour pallet, but can match any colour to suit customer needs

| | | | | | | | |
|-------|---|-------|---|-------|---|--------|---|
| B 100 |  | B 300 |  | B 411 |  | B 704 |  |
| B 101 |  | B 301 |  | B 413 |  | B 803 |  |
| B 102 |  | B 350 |  | B 500 |  | B 900 |  |
| B 103 |  | B 351 |  | B 501 |  | B 905 |  |
| B 200 |  | B 353 |  | B 502 |  | B 1000 |  |
| B 202 |  | B 401 |  | B 700 |  | B 1010 |  |
| B 210 |  | B 410 |  | B 703 |  | B 1012 |  |

The surface of AERO-LEATHER is highly dirt / grime repellent, which reduces the cleaning effort. Ball-point pen marks and stain residues can be simply wiped away with a moist cloth.

EASY CLEAN

AERO-LEATHER causes no skin irritation, features good thermal properties and is resistant to fungal growth. Additionally, the suppleness of the soft surface delivers enhanced comfort for the passenger.

The high elasticity of AERO-LEATHER simplifies the fitting process, even for complex seat shapes. The seat cover stays in the same shape and therefore looks like new for much longer.
